Type of Incident: illegal chemical dump

Description of Released Contaminant: Brawl Herbicide

Volume Spilled:

Ag Related: Yes

EPA Extremely Hazardous Substance: Unknown

Reported to NRC: Unknown

Cause of Incident:

Ag Inspector driving by complex witnessed sprayer backed up and material being sprayed through booms in a stationary spot. No one seen at time. Ag Inspector talked to a Jerel Lindgren and found out what was in the tank. Jerel states that the sprayer was supposed to clean out in field with tank cleaner and spray out.

Notes:

I inspected the dumping site on Thursday June 27 along with the Ag inspector Ken McDonald. I had originally been denied access to the site by the property owner. When Ken came on site I accompanied him and took several photos of the site along with several water and soil samples. There is water in the nearby ditch which intermittently flows into a small northward flowing creek. The area above the creek on the west side had been obviously worked recently and the east side was a plowed field. You could observe dead and yellowed vegetation southward from the dumping point for approximately 12 feet. This also extended approximately 4-6 feet north of the dumping site. Follow up to ensure proper clean up is necessary.

Date: 9/24/2013 **Status:** Inspected; More Followup Required **Staff:** Miller, Adam

Notes:

I inspected the site today and visited at length with the co-owner of the business. He was very cooperative and showed me around the entire site. I collected a soil sample from where the drainage flows into Park River. I collected samples from the drainage ditch itself and from the soil that had been scraped up and piled. These samples are now at the lab awaiting analysis. He stated that he would like to meet with the NDDH on this matter and I agreed. This meeting will be scheduled for late October.

Date: 10/25/2013 **Status:** Post-inspection Update **Staff:** Miller, Adam
